🌐 [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [HackerRank](#)

Data Science enthusiast with a strong foundation in mathematics, computer science, and AI technologies. Proficient in Python, SQL, Machine Learning, Deep Learning, NLP, and Data Analytics, with hands-on experience in data wrangling, EDA, and predictive modeling. Developed AI-driven projects like **FinTrack AI** and **Crop-Shield-AI**, leveraging data-driven insights to solve real-world problems.

Education

- **Kolhapur Institute of Technology College of Engineering** Nov. 2022 – May 2026
B.Tech in CSE AI&ML — CGPA: **8.55/10** Kolhapur, MH
- **SSC (2020)** — Gandhi Sevadham Vidyalaya Arala, **94%** Sangli, MH
- **HSC (2022)** — Adv. Dadasaheb Chavan Institute of Science Masur, **79%** Satara, MH

Technical Skills

Languages and Databases : C++, Python, C, SQL, MySQL, PostgreSQL
Libraries and Frameworks : Scikit-learn, TensorFlow, Keras, Flask, NumPy, Pandas, Matplotlib, Seaborn, Plotly
Data Science Fundamentals : Data Wrangling, EDA, Data Analysis, Machine Learning, Deep Learning, NLP
Developer Tools : VS Code, PyCharm, Jupyter Notebook
MLOPs : Git, DVC, GitHub, Docker, ML Pipelines, MLflow

Experience

Feynn Labs Jan. 2025 – Mar. 2025

Machine Learning Intern

- Worked on AI & ML projects aimed at assisting small businesses.
- Developed **Crop-Shield-AI**, a deep learning model for plant disease classification using **MobileNetV2** CNN architecture on an image dataset, achieving **91%** accuracy.
- Conducted exploratory data analysis on the McDonald's dataset using visualization techniques to derive insights.
- Built an electric vehicle classification model using **Random Forest Classifier** after **web scraping** data, achieving **94%** accuracy.

Projects

FinTrack AI | *Python, Streamlit, NLP, Cohere, Pandas, Matplotlib, Plotly, SQLite3* | [Link](#) Jan. 2025

- Developed an **AI-powered finance tracker** for transaction analysis, finance tracking, and **personalized insights**.
- Launched a **Cohere chatbot** enhancing real-time financial interactions; conducted 10+ user testing sessions to refine chatbot responses and improve overall user satisfaction with financial guidance.
- Utilized Pandas for data processing and Matplotlib, Plotly for interactive **financial trend visualizations**.
- Integrated SQLite3 for efficient transaction storage; built a **Streamlit dashboard** for real-time financial insights..

Movie Recommender System | *Numpy, Pandas, Scikit-learn, NLTK, Flask* | [Link](#) Oct. 2024

- Built a content-based movie recommender system using a dataset of 5000 movies to recommend movies based on their content (descriptions, genres, actors).
- Conducted in-depth data preprocessing and feature engineering by cleaning and preparing movie data, creating informative "tags" for each movie that combined key details. Transformed these tags into numerical vectors using the Bag of Words technique for efficient analysis.
- Leveraged cosine similarity to measure how similar movies are based on their content vectors, enabling the system to recommend the top 5 most similar movies to a user's selection.

Certifications

Machine Learning for Engineering and Science Applications - [NPTEL](#)

Python for ML & DS Masterclass - [Udemy](#)

Extracurricular/Achievements

Technical Team Member | Student Developer Club (SDC), KITCoEK Oct. 2024 - Present

Winner of Project-Based Learning (PBL) Competition for the project FinTrack AI Nov. 2024
